INGREDIENTS IN ACTION

The synergistic blend of AMPED Power is what makes it such a powerful tool to fuel your workouts. Creatine is a natural compound that helps supply energy to muscle. This results in an increase in muscle mass, power, strength, and sprint speed over time. Creatine has been extensively studied for both its effectiveness and safety with long-term use.

Nitrosigine®, a patented product, and citrulline work together to increase blood flow to the muscles and improve performance during workouts. When combined with creatine, these ingredients form a safe and powerful blend designed to improve the overall results of your workouts.
