

BOOST YOUR BRAIN POWER

BENEFITS OF BRAIN BOOST & RENEWAL™...

MEMORY FUNCTION

19 percent increase in memory retention based on how many items a subject could keep in the mind at a time.

QUICKER BRAIN RESPONSE

12 percent increase in overall cognitive function measured by improved response time.

BALANCE

33 percent increase in balance measured while being timed for duration. Subject stood on one leg with arms out and eyes closed.

DECISION MAKING

33 percent increase in decision-making based on improved response time.

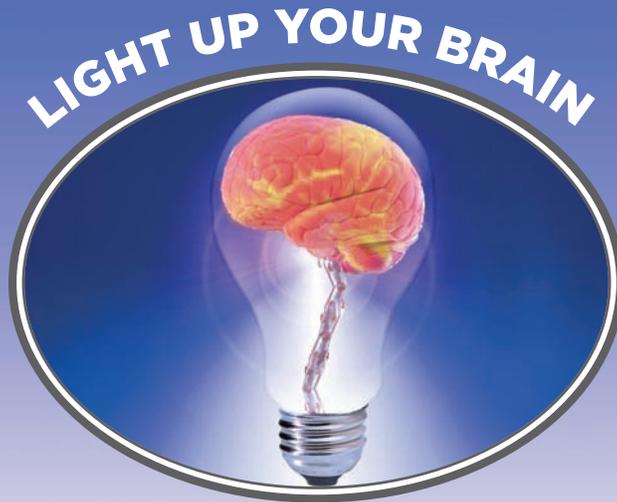

WHAT IS BRAIN BOOST & RENEWAL™ ?

Brain Boost & Renewal™ is a multifunctional product **scientifically formulated to support healthy brain function**, including mental focus, concentration, decision-making, and memory.

BRAIN BOOST & RENEWAL™

Your entire existence is centred in your Brain . . .
the magnificent organ that operates your body.

The human brain is astounding. It works electro-chemically through thousands of different skilled structures, each composed of millions of neurons.

Each brain structure sends timed and coordinated bursts of information – like notes of music – that combine into the magnificent, flowing concerto of your consciousness.

Cognitive impairment is not just a problem for the elderly. Scientists have found progressive declines in memory, learning, attention, and decision-making in people as young as 35.

To maintain a healthy brain and protect it from premature aging, we can do a few things to prevent early decline of the brain functions.

Generally considered the most important is the fact that the majority of brain renewal happens during sleep.

Therefore, a DEEP, restful sleep is essential to having a strong, brain function, including memory consolidation and the growth of new brain cells known as neurons.

The brain, being a very complex organ, requires multiple nutrients and compounds to protect it from factors that cause brain degeneration.

Supplements that support memory and focus are called Nootropics. This is a relatively new term for memory-enhancers, neuro-enhancers, cognitive-enhancers and intelligence-enhancers.

In view of the above, it is clear that it would be wise to invest in your brain health by beginning brain nutrition supplementation with effective nootropics, or brain-enhancers.

Living life to the fullest starts with a healthy well-functioning brain. Brain Boost & Renewal contains natural ingredients clinically tested to improve mental clarity, focus, concentration and memory. Optimize your ability to learn new information and support increased cognitive function.

Brain-friendly nutrients included in Brain Boost & Renewal™

Ginkgo biloba, curcumin (turmeric), velvet bean, and piperine to help improve bioavailability of bioactive compounds like Co-Enzyme Q10, Resveratrol, as well as citicoline sodium which are shown to support neurotransmitter (acetylcholine) production.
