

Collagen Elixir Ingredient Breakdown

Collagen Elixir™ is a potent marine collagen supplement infused with vitamin C, minerals, and superfruits like goji and acerola berry to help hydrate and nourish your skin from the inside out.

Let's dive deeper into these beauty-boosting ingredients!

Marine Collagen Blend

This blend of collagen peptides comes from wild-caught, deep-sea fish, like cod, pollock, and haddock, that are naturally rich in type I collagen. This form of marine collagen contains the amino acids proline, glycine, and hydroxyproline that support the body's natural production of collagen and help promote healthy, hydrated skin.

A Synergistic Blend of Superfruits and Botanicals

Collagen Elixir contains a proprietary blend of botanical ingredients traditionally used for skin health, including phytonutrient-rich goji and acerola berry extracts, moisturizing aloe vera juice, and soothing chamomile extract powders.

Collagen-Boosting Nutrients

Ascorbic acid: Found naturally in citrus fruits, ascorbic acid is also known as vitamin C and is an antioxidant vitamin that supports your natural collagen production and helps protect your skin from damaging free radicals.

Zinc gluconate: A source of zinc and a key mineral in collagen synthesis, playing a vital role in skin, hair, and nail health.

Biotin: A water-soluble nutrient belonging to the B group of vitamins that also plays an important role in hair, skin, and nail health.

Great-Tasting Natural Flavor

Apple juice concentrate: Made from filtered apple juice, apple juice concentrate has a mild flavor and color, making it ideal for natural sweetness and fruity flavor enhancement.

Natural flavors: "Natural flavors" is a regulated term used to define flavorings created using only components found in nature. They are generally made of essential oils, essences, or extracts; fruit juices; and spices.

Stevia leaf extract: A South American herb that is naturally sweeter than sugar and provides no calories.

Other Ingredients

Acacia gum: A water-soluble emulsifier derived from the acacia tree that helps provide a consistent texture.

Citric acid: Naturally found in citrus fruits, citric acid lowers the pH to help maintain freshness.

Sunflower lecithin: A natural emulsifier that helps keep fats and water from separating to produce smoothness.

No-Compromise Quality: Good for You and the Planet

Collagen Elixir is carefully formulated with our planet in mind and uses collagen derived from the skins and bones of wild-caught fish that would otherwise be discarded. Additionally, every bottle is made with 100% recyclable materials. Isagenix follows a no-compromise quality policy that ensures each product you receive has met the highest standards of manufacturing and quality assurance.
