

Hair Revival FAQ

What is Hair Revival™?

Hair Revival is a dietary supplement formulated to stimulate hair growth and support visibly thicker, stronger hair. Hair Revival nourishes and soothes the scalp with natural banana flower extract, biotin, minerals, and amino acids in four tablets daily.

How does Hair Revival work?

The ingredients in Hair Revival work to support an environment that is ideal for hair growth while supplying nutrients that are essential for actively growing hair. Together, the clinically-tested ingredients in Hair Revival work to prime your hair follicles for stronger, fuller-looking hair growth.

Is Hair Revival suitable for all hair types?

Hair Revival is great for all hair types in both men and women.

Who can use Hair Revival?

Hair Revival is recommended for anyone over 18 years of age who is looking for stronger, fuller, and more nourished-looking hair. It's always recommended that you consult with your doctor about your dietary supplement use while pregnant or breastfeeding or if you have a medical condition.

Will Hair Revival help with hair loss related to a medical condition or treatment?

If you are experiencing hair loss that you suspect is related to a medical condition, working with your doctor or getting an assessment from a dermatologist can help you to identify and manage the cause of your hair loss.

Hair Revival is a dietary supplement made with natural ingredients to support hair growth. It has not been tested in individuals with hair loss related to a medical condition and is not intended to diagnose, treat, cure, or prevent any disease.

How long before I see results with Hair Revival?

The amount of time before you start seeing results will vary between individuals; however, many Hair Revival consumers experience results in as little as two months of daily use.

Will the benefits of Hair Revival continue if I stop taking it?

As with most dietary supplements, the benefits of Hair Revival will slowly fade if you discontinue daily use. For maximum efficacy, it's recommended you take two tablets of Hair Revival, twice daily.

Will I have better results if I take extra servings of Hair Revival?

There is no additional benefit from taking extra servings of Hair Revival. This formulation is clinically tested to provide benefits at its intended serving of 2 tablets, twice daily.

continued...

Will Hair Revival cause me to grow unwanted body hair?

No. Hair Revival will not cause unwanted body hair growth. The hair on your scalp is different from hair in other areas like the face and body. Hair on the scalp grows on a different cycle from other hair and responds to specific signals in the body. Hair Revival is a dietary supplement made with natural ingredients. It doesn't contain drugs or other substances known to cause undesirable or abnormal hair growth.

Can I blend Hair Revival tablets into my shake?

If you do not prefer to swallow tablets, Hair Revival tablets can be blended into a shake or crushed. However, this method may change the flavor and texture of your shake. The ingredients in Hair Revival have a mildly tart flavor when crushed.

Do I need Hair Revival if I already use Isagenix Collagen Elixir™?

Collagen Elixir is a potent blend of hydrolyzed marine collagen and powerful botanicals that nourish your skin from the inside out, promoting enhanced elasticity, firmness, and hydration for a healthy and radiant complexion. Collagen Elixir is formulated especially for skin health benefits. If you are looking for hair health benefits, adding Hair Revival to your daily beauty supplement ritual is recommended.

Can I take Hair Revival on a Cleanse Day?

Yes. Hair Revival may be taken on a Cleanse Day if dietary supplements are a regular part of your Cleanse Day routine.

Why does Hair Revival have a child-proof cap?

Small objects like capsules or tablets can pose a choking hazard for young children and should always be kept out of reach of children. A child-proof cap was included with Hair Revival as an extra precaution. Hair Revival is not intended for use by children but does not contain any ingredients that pose a unique risk to children.

Statements above have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.
